EDUCATION

University of Utah

Master of Science in Cybersecurity Management (Specialization: Agentic AI in SecOps)

Salt Lake City, UT

Expected July 2026

Utah Valley University

Bachelor of Science in Information Technology (Network Security Focus)

Orem, UT

December 2022

TECHNICAL & PROJECT MANAGEMENT SKILLS

- **Project Management & Frameworks:** Agile/Scrum Methodologies | Project Lifecycle Management | Stakeholder Communication | Risk Mitigation | Resource Coordination | Change Management | Workflow Automation
- **Agentic AI & Orchestration:** CrewAI | LangChain | LLM SecOps | Prompt Engineering | Llama 3.2 | Ollama | RAG
- **Security Engineering:** Autonomous Incident Response | SIEM (Splunk/Wazuh) | Forensic Triage | MITRE ATT&CK | Linux Kernel Networking | Vulnerability Management
- **Infrastructure & DevOps:** NVIDIA DGX (ARM64) | Python (FastAPI) | Docker | Azure | Active Directory | PowerShell | Terraform

GRADUATE RESEARCH & SECURITY INITIATIVES

Hybrid-LLM Autonomous SOC & Active Defense Framework

December 2025 – Present

Lead Project Architect (MS Capstone Research)

- Served as Project Lead for a technical development cycle architecting a Hybrid-LLM Autonomous SOC, managing project milestones, delivery timelines, and overall project scope.
- Coordinated the integration of isolated Docker honeypots with a custom FastAPI backend, engineering regex-driven Python telemetry bridges to dynamically extract attacker IPs.
- Managed the execution of a deterministic Active Defense Governance Layer in Python to intercept AI-generated actuation commands, enforcing strict infrastructure IP whitelisting.
- Directed the porting of the agentic engine to defend a simulated multi-tenant Web Application stack, reconfiguring RAG playbooks to triage web-specific vulnerabilities.
- Achieved autonomous threat containment by programmatic timeline delivery of dynamic iptables drop rules against validated malicious endpoints.

Secure LLMops Gateway (Stateless Security Proxy)

May 2026

SecOps & Platform Implementation Lead

- Directed the engineering and deployment of a stateless security proxy in Python (FastAPI) designed to intercept, sanitize, and audit Generative AI prompt payloads.
- Managed the design of a high-precision Data Loss Prevention (DLP) engine to auto-redact PII, ensuring strict organizational compliance with PCI-DSS and SOC 2 data-in-motion standards.
- Coordinated the override of LLM safety-refusal guardrails on redacted payloads by developing a custom context preservation layer, reducing false-positive blocks for local Llama 3.2 models.
- Implemented SIEM-ready JSON logging frameworks to track processing latency and transaction UUIDs while completely preventing raw-text PII leakage.
- Hardened project delivery by packaging the proxy inside a lightweight Docker container configured to run under a restricted non-root system user.

Independent Autonomous Security Lab

May 2025 – Present

Lead Architect / Researcher

- Designed secure local LLM inference pipelines using FastAPI and Docker to ensure privacy-compliant AI deployments on enterprise hardware.
- Simulated network intrusion scenarios to research and validate automated AI-driven active defense mitigation playbooks.

PROFESSIONAL EXPERIENCE

MyBrow Threading <i>Operations & IT Project Coordinator</i>	Salt Lake City, UT January 2024 – Present
• Led the end-to-end delivery of a digital client intake and automated scheduling system, managing product requirements, software selection, and testing phases. • Integrated no-code architectures (Cal.com and Tally.so) with business workflows to optimize scheduling constraints and reduce administrative overhead. • Managed client escalations, triaged system misconfigurations, and served as the single point of contact for technical problem resolution.	
Karuwaa Express <i>IT Operations & Security Manager</i>	Sandy, UT August 2024 – April 2025
• Directed the implementation planning and timeline execution of a Formal Risk Treatment Plan for high-risk assets and enforced Role-Based Access Control (RBAC). • Managed mandatory Staff Security Awareness Training deliverables, achieving a 0% phishing click rate. • Mitigated internal fraud through least privilege enforcement and cross-departmental security monitoring.	
Intermountain Health <i>Patient Access Specialist (Seasonal Contract)</i>	Murray, UT May 2024 – August 2024
• Validated patient identity and secured highly sensitive Protected Health Information (PHI) under strict HIPAA and PCI-DSS compliance frameworks. • Identified and escalated potential identity fraud anomalies during high-volume digital intake processes.	
Walmart eCommerce <i>Partner Support Specialist</i>	Remote September 2020 – September 2021
• Managed complex enterprise workflows across Salesforce instances, coordinating the resolution of high-priority technical and partner issues. • Drove business process optimization projects that resulted in a 20% verified increase in overall team delivery and output efficiency.	
CenturyLink <i>IT Support Help Desk</i>	Monroe, LA January 2019 – May 2019
• Managed Active Directory for 100+ endpoints, enforcing GPOs and resolving Access Control List (ACL) violations. • Provided remote systems support and integration troubleshooting for VPN and Citrix infrastructure using PowerShell.	

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

CompTIA: Certified Cybersecurity Analyst (CySA+) | Systems Security AI+ (SecAI+)
